V-5x power amplifier

SoundStage.com Reviewer's Choice Award 2002

"Build quality is exemplary and better than most achieve even at twice this price. But more importantly, the scale and presence that it reveals is transporting."

– Jason Kennedy, *Hi-Fi+*

The Ayre V-5x power amplifier gives voice to music's heartbeat. Enormous power reserves liberate the full range of dynamic contrast, while the zero feedback design flawlessly keeps time relationships intact. Fully balanced from input to output, the V-5x illuminates the soundstage with nuanced precision. Each musician is transported to your listening room with unrivaled vitality and vigor. Sixteen high-current output devices per channel assure absolute stability with any loudspeaker load. The Ayre V-5x delivers the quintessence of music.

Features:

- Zero feedback, fully balanced discrete circuitry
- 16 high-current output devices per channel / FET input stage
- Ayre Conditioner™ (patent pending) power line RFI filter
- Sophisticated DC protection circuit
- Remote "trigger" operation

Specifications:

- 150 watts continuous per channel (8 ohm load)
300 watts continuous per channel (4 ohm load)
- Power Consumption: 10 watts in standby mode;
100 watts in operating mode, no signal
- Frequency Response: DC – 200kHz
- Input Impedance: 100 k Ω (per phase)
- Gain: 26 dB
- 18"W x 15.75"D x 7.75"H
- 55 pounds (25 kg)

The heart and soul of music and film reproduction.
